Smile Design

CROWNS

Crowns are used to restore function and aesthetics to an affected tooth. It can also be placed on an implant to achieve the functional shape and structure of a tooth.

ORAL REHABILITATION

Oral rehabilitation is the branch of dentistry focussed on diagnosing the patient's problem and creating a specific treatment plan to restore the aesthetics and functionality of his oral cavity

VENEERS

Veneers are a treatment that will achieve the effect of a natural smile, they are minimally invasive and very durable as long as they are performed with a professional and the instructions are followed to the letter.

DENTAL IMPLANTS

Dental implants are fastly becoming the new standard in tooth replacement. They are a popular and effective long term solutions for people who suffer from weak teeth, missing teeth, or chronic dental problems.

SMILE DESIGN

Smile design is a set of procedures that change the color, size, shape and position of the teeth to give the smile a more harmonious appearance.
